About Me

My interest in mobile application development stems from my passion for exploring new technologies and using them to create innovative solutions. My goal is to develop mobile applications that simplify users' lives and provide them with efficient, useful, and engaging experiences. I have experience developing applications with **Flutter, Swift** (UIKit and SwiftUI), and **React Native**, applying **Clean Code** principles and **Design Patterns** to ensure scalable, maintainable, and high-quality applications. In Swift development, I actively utilize the **Combine framework** for handling asynchronous data streams and building reactive, responsive UIs. I focus not only on functionality but also on visually appealing and user-friendly design, keeping up with the latest trends in the mobile world and integrating them into my projects.

Education

Bachelor's Degree in Computer Technology and Information Systems**/**Mersin University

Relevant Courses I've Completed

- **Flutter Development for Android and iOS from Scratch** Certificate Link

- **iOS Mobile App Development Training | Swift | 2025 (UIKit)** Certificate Link

- **iOS App Development with SwiftUI | Swift | 2025** Certificate Link

- **React Native Mobile App Development Training** Certificate Link

- **Git and GitHub Usage** Certificate Link

Experience

AsolidTech – Mobile Application Developer
July 23, 2025 – August 18, 2025
